

SUMMARY

Software Engineer with 3+ years of experience working on full-stack web applications and AI-powered solutions. Skilled in TypeScript, React, Angular, Python, FastAPI, Node.js, PostgreSQL, Docker, Kubernetes, and CI/CD workflows. Experienced in responsive UI, backend optimization, scalable system design, and secure authentication. Delivered measurable improvements in dashboard load times, deployment speed, and system security.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS, Bash, JSON

Frontend Development: React, Angular, Tailwind CSS, Material UI, PrimeNG, Vite, Responsive Design, UI/UX Implementation

Backend Development: FastAPI, Flask, Node.js, REST APIs, Microservices Architecture, API Development, Authentication & Authorization

Databases: PostgreSQL, ChromaDB, SQL Query Optimization, Data Pipelines, Metadata Management

AI & Machine Learning: LangChain, RAG, OpenAI Embeddings, Ollama, Llama, Semantic Search, NLP Feature Engineering

Cloud & DevOps: Docker, Kubernetes, Docker Compose, Git, GitHub Actions, CI/CD Pipelines, Cloud Deployment, Container Orchestration

Testing & Quality: Jest, Jasmine, Karma, React Testing Library, Automated Testing, API Testing, Debugging

Security: JWT Authentication, OAuth 2.0, HTTPS, Role-Based Access Control, Input Validation, Secure Data Transmission

Hard Skills: Performance Optimization, Code Refactoring, Component-Based Architecture, Data Modeling, Query Tuning

Platforms & OS: macOS, Linux, Windows

Project & Collaboration: Trello, Figma, Agile Methodologies, Sprint Planning, Code Reviews

WORK EXPERIENCE

Software Engineer Intern

Jan 2026 – May 2026

Capgemini

Maryland, USA

- Worked on a Trade Promotion Optimization platform using TypeScript, React, Python Flask, and FastAPI, adding 50+ features that improved promotion planning speed by 30%.
- Made responsive interfaces with Tailwind CSS, increasing active usage across desktop, tablet & mobile devices by 25%.
- Set up Docker containers and Kubernetes clusters with GitHub Actions CI/CD, reducing deployment time by 45% and ensuring smooth multi-environment releases.
- Enhanced PostgreSQL queries and reporting pipelines, lowering dashboard load time from 3.2s to 0.8s (75% faster).
- Applied OAuth 2.0 login, JWT authentication, and role-based access control, securing 100,000+ user accounts and sensitive promotional data.
- Delivered a map-based sales dashboard showing 15+ KPIs, helping bottlers review regional sales and improving reporting efficiency by 35%.

Junior Software Engineer

Nov 2021 – June 2024

Infosys Limited

Hyderabad, India

- Supported a full-stack e-commerce platform using TypeScript, Angular, Node.js, and PostgreSQL, handling 10,000+ concurrent users and improving checkout conversion by 22%.
- Made responsive web pages using Tailwind CSS from Figma designs, keeping layout consistent across 40+ pages and improving user experience by 30%.
- Optimized Node.js REST APIs & PostgreSQL queries, reducing response time by 30% for dashboards & reporting tools.
- Managed Docker containers & GitHub Actions pipelines, automating testing & deployment across cloud environments.
- Added JWT authentication, HTTPS security, and input validation, reducing security incidents by 40% and protecting sensitive customer data.
- Resolved 60+ production issues and maintained automated tests using Jest, Jasmine, Karma, and React Testing Library, achieving 100% coverage and improving system reliability.

PROJECTS

Cloud-Integrated AI Platform for Drought & Vegetation Health Monitoring

Aug 2025 – Jan 2026

- Designed a cloud-integrated AI platform for real-time drought severity and vegetation health monitoring using weather and satellite data.
- Ingested and processed features including rainfall, temperature, humidity, soil moisture, wind speed, and NDVI.
- Developed a Random Forest model for drought severity classification (levels 0–4) and an LSTM model for short-term forecasting.
- Deployed models using AWS Lambda, API Gateway, Amazon S3, and ECR within a serverless architecture.
- Built a responsive HTML/JavaScript dashboard with heatmaps and 21-day drought forecasts.
- Exposed prediction services via RESTful APIs for scalable access by farmers, government agencies, insurers, and NGOs.

Integrating AI on Recruitment Strategy

Sep 2023 – May 2024

- Developed an AI-powered recruitment analytics platform to improve candidate screening and job matching.
- Built interactive dashboards using HTML, JavaScript, and Power BI to analyze job openings and candidate profiles.

- Integrated HireVue and LinkedIn APIs to extract candidate data and generate automated skillbased recommendations.
- Evaluated machine learning models using accuracy, precision, recall, and F1-score.

EDUCATION

UNIVERSITY OF MARYLAND BALTIMORE COUNTY	Maryland, USA
Master of Science in Computer Science (GPA – 3.7)	Aug 2024 – May 2026
SATHYABAMA INSTITUTE OF SCIENCE AND TECHNOLOGY	Chennai, India
Bachelor of Engineering in Computer Science	Sept 2020 – Aug 2024
